

If your home could talk, what would it say? Achieve optimal, affordable and effective operational synergy with IoT.nxt[®]'s market-changing IoT solutions. Resolve your business challenges through our world-class innovation which allows your sites to communicate clearly to you, from anywhere, globally.

Business challenges

Home automation and consumption monitoring solutions are generally expensive and tend to rip and replace. Horizontally integrated home solutions with no retrofit do exist. However, increased home security and utility usage monitoring and control needs to become more accessible in South African homes.

The IoT.nxt[®] solution

The IoT.nxt[®] solution would deliver a near real-time, holistic view. The following properties are examples of what could be visualized:

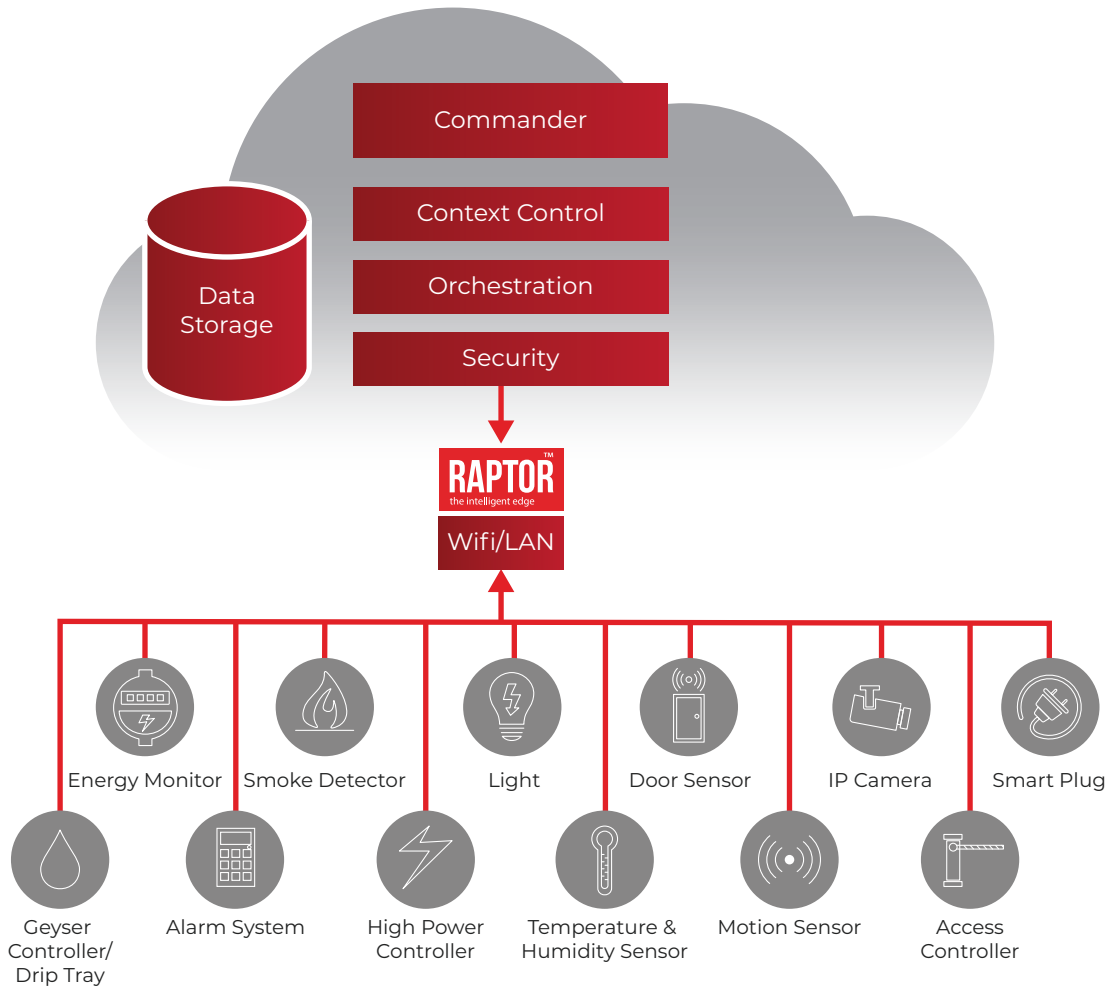

- Geyser status, leak detection, consumption and power control
- Door, gate and garage status and control
- Alarm status and control
- Pool pump status and control
- Motion detection and smoke detection
- Energy consumption monitoring
- Remote CCTV streaming/control
- Temperature and humidity monitoring
- Lighting/appliance control
- Door/window status
- Gate/garage status and control
- Remote camera streaming

Eco-system overview

Optimizing your business eco-system needn't be complicated.

Solution benefits

As the client, you can use real-time visualization to control the key aspects of your home. Furthermore, having a fully automated home, and access to real-time visualization of the home's camera streams, can also help to reduce the cost of utilities as well as alert you of any security breaches in a timely manner.

Historical data reports and intelligent dashboards will also give you access to real-time information about the status of your home automation.

What makes our offer unique?

Rapid digitization

Intelligent filtering of data at the edge

Real-time in-shift optimization of operations

Integration of analog and digital, legacy and new devices

Quick implementation with no disruption, retrofitting our technology to create interoperability between new and legacy infrastructure and equipment

Consolidation of business-wide processes and data

Remote monitoring and management of businesses
