

If your hospital could talk, what would it say? Achieve optimal, affordable and effective operational synergy with IoT.nxt[®]'s market-changing IoT solutions. Resolve your business challenges through our world-class innovation which allows your sites to communicate clearly to you, from anywhere, globally.

Business challenges

Whether private or public healthcare, hospitals need to achieve seamless integration between their many business units. When there is a lack of cohesiveness, the end customers, citizens as well as the business value chain is compromised. To achieve optimal, affordable and effective operational synergy with Vodacom and IoT.nxt[®]'s market-changing IoT solutions, resolve your healthcare challenges through our world-class innovation.

Common challenges facing the healthcare sector:

- Asset tracking & management, security and operational inefficiencies.
- Lack of environmental monitoring and management.

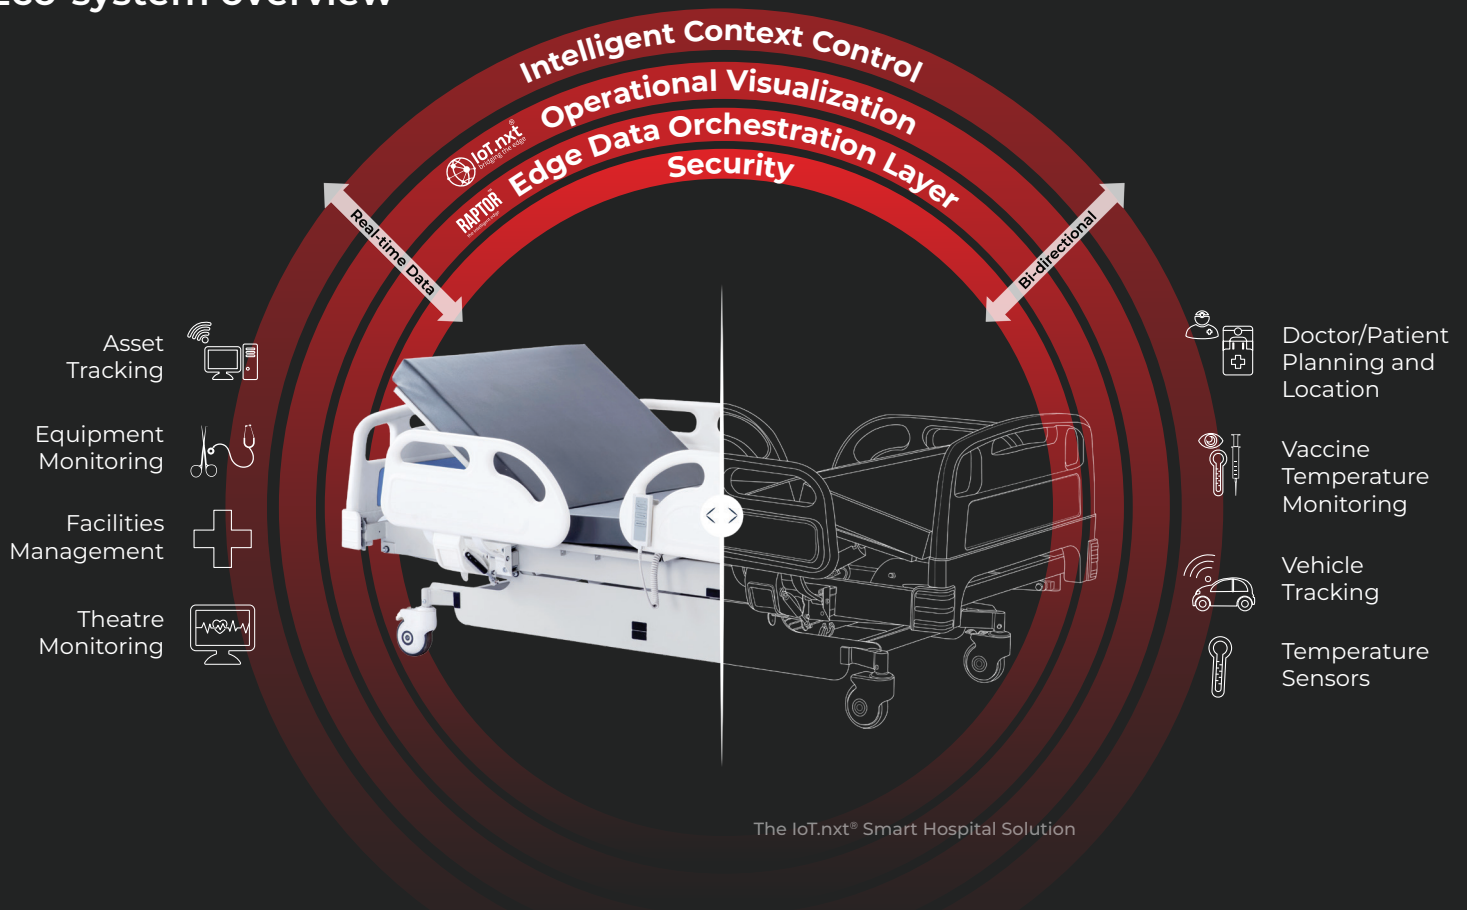

- Limited clarity on incidents and occurrences.
- Lack of real-time high care and infant care body temperature monitoring.
- High operational costs and low productivity.

The IoT.nxt[®] solution

IoT solutions link all systems and sub-systems together in a seamless, aggregated IoT healthcare facility. This delivers real-time and hyper-contextualized information, feeding business intelligence, process efficiencies, proactive maintenance and incident management, and reduced manual intervention.

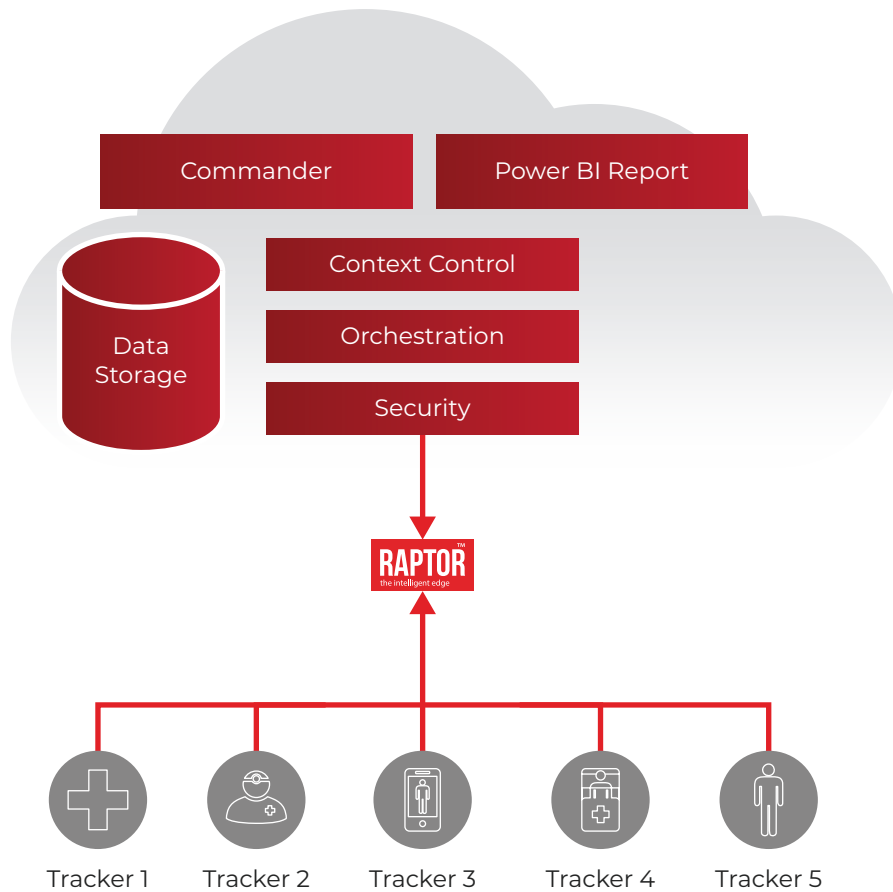

Our integrated solutions are underpinned by IoT.nxt[®]'s Raptor™ smart edge gateway, a world-class system.
